

Nexamp Completes 1.58 MW Solar Array for Pittsfield Wastewater Treatment Plant

Working with cities and towns across the Commonwealth to install these solar projects has been a fantastic experience. Providing long-term savings for our clients with high quality clean energy projects is our primary goal, whether those clients are businesses or, in this case, the Massachusetts taxpayers.

John Malloy
CEO, Nexamp

PROJECT SPECIFICATIONS

Capacity	Estimated Annual Production	Components	EPC
1.58 MW	1,950,000 kWh	7,545 Kyocera modules Solectria inverters PanelClaw mounting system	Nexamp, Inc
