

Worcester Academy Goes Solar with 92kW Installation Across Three Campus Buildings

Worcester Academy's primary benefits are fixed costs for 6% of our electricity over a 20-year time span, we get to use the solar panels as an enormous curriculum piece as part of our sustainability commitments and Worcester Academy gets to be a strategic partner with Nexamp and the state to help meet its goal of installing 250MW of solar capacity by 2017.

Mike Carroll

Director of Environmental Sustainability, Worcester Academy

PROJECT SPECIFICATIONS

Capacity	Estimated Annual Production	Components	EPC
92 kW	101,000 kWh	439 Kyocera modules Solectria inverters PanelClaw mounting system	Nexamp, Inc
